We support your project and your team

R&D SERVICES

We are partners in successful projects and have experience with the acquisition and management of project grants.

Proposal writing and carrying out of national Projects such as in the **IEA research cooperation programm**. In the EU project **EcoMeTex** we developed an Ecodesign methodology for textile floor coverings.

WORKSHOPS AND TRAINING

We regularly offer seminars and workshops for companies and organizations, on Ecodesign, product development and Circular Economy topics.

ECODESIGN — development of eco-products

1. ANALYSIS

- Life Cycle Assessment (LCA)
- Product Carbon Footprint (PCF) with own software **ECODESIGN⁺**
- Environmental benchmarking

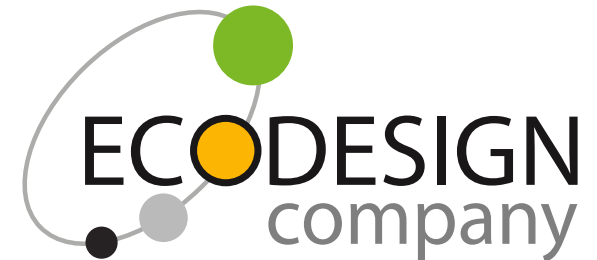

2. IMPROVEMENT

- Product development with Ecodesign principles
- Improved product concepts
- Product and process improvements

3. COMMUNICATION

- Environmental Product Declaration (EPD)
- Development of environmental labels
- Training and seminars
- Introduction to life cycle thinking

ECODESIGN company
engineering & management consultancy GmbH
Schwindgasse 4/2, 1040 Wien, Austria
Tel.: +43 1 40 35 611 -30, **Fax** -16

www.ecodesign-company.com

Engineering consultancy for the development and marketing of environmentally superior products.

www.ecodesign-company.com

"we help our clients develop and market eco-products successfully"

Benefit from our expertise and our extensive experience with product-related environmental issues. We think globally, work interdisciplinary, and can help you gain a competitive advantage!

ENVIRONMENTAL ASSESSMENT

We have completed Life Cycle Assessments and derived improvement measurements for the series of **PHILIPS** Digital Pocket Memo products .

PRODUCT DEVELOPMENT

In the project **eVienne** we developed, a lightweight modular electric vehicle concept for urban transport. We were responsible for the technical construction, the finite element simulations, as well as for the Ecodesign aspects.

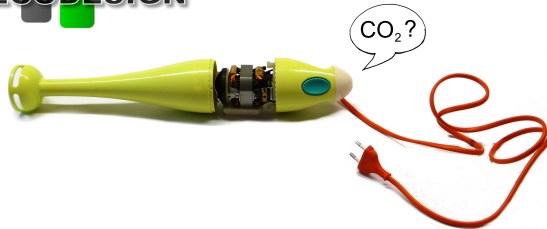

ENVIRONMENTAL COMMUNICATION

METEKA GmbH manufactures equipment for disinfection of medical waste. For the **MEDISTER** products we completed a Life Cycle Assessments according to ISO 14040/44, and communicated the results in an Environmental Product Declaration EPD according to ISO 14025).

We have developed our own software **ECODESIGN+**, which supports our clients in the environmental assessment and improvement of products and processes.

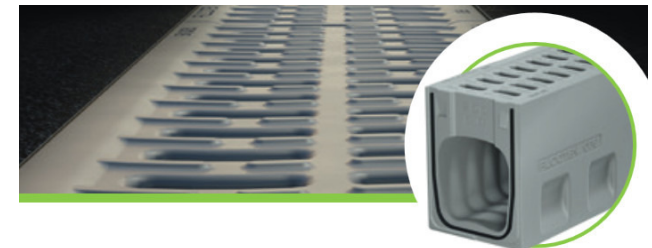

We developed our own patented product, the **Varroa Controller**, to combat the Varroa mite, a pest of the honey bees.

www.varroa-controller.com

It uses the principle of heat treatment, allowing organic and safe bee-keeping without colony losses.

We completed the Life Cycle Assessment of the cement and Filconten® drainage channels of **BG Graspontner GmbH**. This LCA has been verified and key data published in the company information brochure of the innovative product Filconten® one.
